

Lifespring Clinic – Health Insurance & Billing

1. Billing & Insurance Overview

Lifespring Clinic supports patients with routine billing and insurance-related processes associated with consultations, diagnostics, and treatment services.

- Billing is completed as part of the checkout process after the consultation or service.
 - Insurance information may be verified during registration when applicable.
 - Patients receive receipts or payment confirmation after completing eligible charges.
-

2. Required Insurance & Billing Documents

- Valid photo identification.
 - Current insurance card or policy details, when applicable.
 - Referral or authorization documents when required by the insurance provider.
 - Previous medical records or relevant treatment documents when needed for the visit.
 - Payment method for services or charges not covered by insurance.
-

3. Billing Process

1. Registration – Patient and insurance information is collected and verified.
 2. Service Delivery – Consultation, diagnostic testing, treatment, or other eligible services are provided.
 3. Charge Calculation – Applicable service charges are prepared for checkout.
 4. Insurance Processing – Insurance details are submitted or processed when applicable.
 5. Payment & Receipt – The patient completes any applicable payment and receives confirmation or a receipt.
-

4. Insurance Coverage & Patient Responsibility

- Coverage depends on the patient's insurance policy, plan rules, and eligibility.
 - Patients should confirm coverage requirements with their insurance provider before planned services when necessary.
 - Services, deductibles, co-payments, exclusions, or non-covered charges may result in patient responsibility.
 - Patients should provide updated insurance information whenever policy details change.
-

5. Billing Queries & Additional Notes

- Patients should keep receipts, payment confirmations, and insurance correspondence for their records.
- Billing questions should be raised with the clinic's billing or reception team for clarification.
- Insurance approval or reimbursement decisions are subject to the terms of the patient's insurance policy.

- For planned procedures or diagnostics, patients are encouraged to clarify expected costs and insurance requirements in advance.
